Memo from

JOSHUA LEDERBERG

To: Abram

NOV 24 1976

Thank you very much for letting me see this correspondence. It was fun to be reminded again of your seminal role in setting up SMDS properly (not that I needed reminding!)

Well at least there are some strong hints; and tie points of time + place.

Henry Kaplan was useful only in directing me to Fred Terman who chaired the search; and just might be the one to have saved some files.

Yours.

Josh.
