JOSHUA LEDERBERG

Brian Chait

MAY 3 1990

Why not virus particles?

You could get some tiny phages from Norton Zinder.

They might survive the journey better than naked DNA.

J

I have left a copy for Dr. Baltimore

P.S. What are your current tensions?

(the obvious ...) for

a) preparative separation
(with a TOF instrument?)

b) ms/ms after fragmentation.
e.g. to detect an I label ...
