Personal memo from
JOSHUA LEDERBERG

Dr. Barton Childs

JUN 22 1993

Dear Barton

Thank you very much for your letter of June 18 which walked many excellent points.

Have you seen Bill Trager's "Living Together" – on the evolution of parasitism. Chock full of many provocative theses.

"Man-made species" may come from Gordon Childe. ~~See a book review in Nature~~ enclosed. perhaps Kroeber before that

Yours

JL
