Personal memo from
JOSHUA LEDERBERG

Dr. R.E. Huber

JUL 11 1994

Dear Dr. Huber

β-D-galactosidase.

I write asking 2 favors:

1) Please send me your recent papers on the active site.

2) I pray you, for the Glu-537 replacement mutants you have constructed. My purpose is for studies of mutagenesis and recombination at precisely defined sites. We have been working for a while with Elois Cupples' strains.

Yours sincerely,

Joshua Lederberg
