Personal memo from
JOSHUA LEDERBERG

David Talmage M.D.

JUN 15 1988

Century of Progress.

I really enjoyed the tidal sweep of your address.

Re Synnott – I do not often see reference to Montclair NJ – but I was born there.

One small point: Griffith in 1928 transformed pneumococcus with killed cells. In 1944 Avery et al. showed that the relevant substance was DNA.

all best wishes,

J
