Dear Josh.

I was very pleased and much interested by your recent correspondance which I received by mail, since I have changed, some time ago, my e-mail
My new e-mail is:

bussardpages@wanadoo.fr

You can use also my fax, which could be convenient

(33) 04 93 32 7400

I understand that, unlike most immunologists, you do not, once and for all, eviscerate, any instructionist aspect in the immune response, though you consider it most unlikely.
This comes from the fact that you are (as I am) still interested in the Epistemological aspect of Immunology.
Your rewriting of your 1989 Science Paper is a model of clarity and concision, I wish I could have written it
I am writing a longer and clearer paper about the anomaly of prions in Mol. Biol in general trying to use prions effet in Saccharomyces & Podospora to avoid all the clinical "mismash" in BSE
Have you read the last book of Thomas Kuhn: "The road since Structure" The University of Chicago Press ($1.000 Fascinating)

Yours as ever Alain
