Memo from
JOSHUA LEDERBERG

To: Arthur Koch

FEB [illegible] '73

re Gene duplication
Thank you for the
reprints.

Duplication of genes for
evolutionary diversification
goes back well before Lewis '51.
See my paper in Heredity
2:145 (1948) @ p. 188
for a particular twist, and
citations to earlier suggestions
(Metz, Weir, Beijerinck).
