Personal memo from
JOSHUA LEDERBERG

Dr. B. Davis

10/26/93

Dear Bernie –

Thank you for Bioessay. It evoked many warm memories.

We're back into penicillin selection! Trying to make it work to select lac mutants. For some reason that's not totally straightforward.

Thank you for bringing me posted on your physical conditions ... and let me admire the spirit with which you face it. I know it's not easy.

Yours,

Joshua.
