Andre Lwoff
Pasteur Inst.

Dear Andre — Feb. 1 ~~2/1~~ 88

What a pleasure to see you again!

Thank you for setting me straight about d'Herelle, and for reminding me about Mueller.

I had read all of his work on bacterial nutrition; but I did not recall that he was so clear about hetero-trophism ≡ loss of synthetic ability.

Enclosed is the final draft of my memoir on Ed Tatum

I also enclose the reference to a simple "viroid", namely OH^-

Looking forward to seeing you in June,

Sincerely,

Joshua
