DEPARTMENT OF ZOÖLOGY

Dear Josh,

Would you please take care of the enclosed request? Lillian is not returning to Columbia until September & we do not have the stocks here.

I'm relying upon my memory in assigning mating types to these stocks. I'm not exactly sure what crosses I suggested. I think these stocks will do. If not Miss Rippell will let me know immediately. They're in somewhat of a rush because they plan to run through the experiments before the students do.

Are we right in expecting the Bonners this week? The Schraders are here for a few days & look in the best of health. Ponte-corvo went fishing with us a few days ago & landed a record 90 lb. striped bass - the first fish he ever caught in his life.

Tom Nelson & Carl Clark have done very well in their work up here. I think we have two good boys in them. Edith Krugelis arrived recently & seems to be having a good time. All of the news here is of a personal recreational type so I'll spare you the boredom.

Regards,

Francis.
