Shattered Mirrors

Dear Dean Price -

Thank you for sending me your book and for understanding its message.

May I burden you with a bit more on the same theme.

The prospect of a broken civility — aggravated by a population of menacing "lepers" - and by what numbers of them will do in a techno-fragile society when they have "nothing to lose" — is an ominous metaphor for the 3d world.

A brighter note is a turnaround of understanding (a belated one!) in the scientific community generally.

Sincerely,

Joshua Lederberg
