Personal memo from
JOSHUA LEDERBERG

Dr. Sheldon Green

FEB -5 1988

Molecular processes in astrophysics

Dear Dr Green —

It's a bit late in the day to be responding to a line in your 1981 review, and perhaps better never than late. But I hope you will sympathize after perusing what I enclose — and imagine what knocks I get for it during the ensuing decade.

If you have more recent reviews, they would be most welcome

Yours,

Josh Lederberg

(* and should expect from an article called "Moondust!").
