Dear Mike –

If you meant it, I would appreciate your investigating what really happened – the enclosures can be a point of departure.

I have guessed that conflicts over relocating Genetics to Davis were a central issue.

As I am working on an autobiography, I would like to make fair and informed comment – but about institutional process, not personality.

I was not too distressed by Jenkins letter of 3/13/58. It released me from my commitment to UC and allowed me to proceed with Stanford.

When will you be in N.Y.C.?

Yours,

J

PS. UC in the 1950's

Do you know of any memoirs or histories covering that period.

Tranquil!
