Personal memo from
JOSHUA LEDERBERG

Hon. Richard Dantzig
Undersecretary, Dept. Navy
Pentagon

FEB - 2 1994

CW and assyltik. ops.

There is an abundant literature on the Bari incident but this covers the gist.

The oil/mustard brew is particularly horrendous. oil/nerve gas might be likewise. And the naval protective gear would not be too apropos

One also has to contemplate nerves with chemical warheads.

Decon facilities are unlikely to be handy on the beach!

I would be very much interested to see the June 20 1944 "official report".

I look forward to seeing you for lunch on Feb 16.

Yours,

Joshua.
