Dear Josh

Re: penicillin etc.

It'd be nice if Bernie wrote such a piece. Only recently did I find out that he'd patented the procedure.

Did he? If I'd even heard, I'd forgotten. (1)

Since your memories are your memories feel free to write as you please. One point. My memory, which may be fallible, says that before Luria we did not plan immediate publication. To be part of my thesis.

You may be right. I'll see if I have any correspondence to clear that up. (2)

Yours
Norton

Josh.

(1) Precisely why he should write. Also how he came to same idea. Also stumble on phenotypic expression. First Biotech Patent?

(2) Certainly a peculiar if not uncomfortable fact, if true. Indeed you might have written to Francis in despair of my ever doing anything else?

Norton
