JOSHUA LEDERBERG

Drs. Henkin and
Duda.

12/8/92

Ur-λ (Science 11/13)

I'd be curious to learn what you know of the "Calendar-Kellenberger" strain of K12 (λ) and its travels.

Alternatively I could fish out a couple canonical originals of K12 for comparison with what you have today. They've never been to Paris or Pasadena

Sincerely,

Joshua Lederberg
