Personal memo from
JOSHUA LEDERBERG

Dr. Otto Landman
Biol.
Georgetown Univ.

FEB 16 1988

Dear Otto –

Lo, after these many years, can you bring me up to date on the mechanism of reversion, L-form to bacillary, in B. subtilis?

The last I have in hand is your paper in J. Bact., Dec. 1968.

I did nothing further, experimentally, since my paper with St. Clair in 1958. But I think back to the issues of primers, etc. from time to time.

With best wishes,

Sincerely,

Jim.
