Dr. Herman Branson
Department of physics
Howard University
Washington, D. C.

Dear Branson:

I have put in some time perusing your reprint, THE FLOW OF A VISCOUS FLUID IN AN ELASTIC TUBE: A MODEL OF THE FEMORAL ARTERY.

I need a dictionary, a calculus book, a mathematics for elementary students, and a physics for beginners to get any idea of what you're talking about, but it looks good! I'm glad that we don't have to use this in order to stop hemorrhage from an injured femoral artery.

Sincerely yours,

CRD:gw
