120 West 84th St

May 6th

Dear Miss Sabin,

I have just rec'd from you a second copy of your splendid monograph on your work of the brain. But I have no answer to the question I put to Mrs. Claribel Cone, namely, whether you would be willing to accept for the four summer months the position as assistant in the Neurological dispensary clinic at the Presbyterian Hospital in New York. I do not think

that any salary goes with the place, - but the medical opportunity is really quite fine - Please let me know at once

Sincerely yours
Mary Putnam Jacobi
