

Dear Joe:

Some typographical corrections on Memo dated 9/22.: The man is Ted Hauschk.  
at Roswell Park. Chester Beatty lab in London.

Nadi (not knotty) reagent. You probably caught most of ~~this~~ in your own listening.  
— By the way, Tom Nelson showed up at the lab. here, primarily to go over an ms.  
on kinetics of recombination that is about ready for publication. I haven't told him  
that I mentioned you to him, but having talked to him, I would not take back my  
recommendation. He is on his way West, address indefinite just now, but his father  
(at Rye) is handling his mail.

We have a W-1485 S<sup>r</sup> of our own now, and will include same with W-2745 (Serratia)  
in a shipment today.

Yours sincerely,

Joshua Lederberg
