Professor Joshua Lederberg  
Department of Genetics  
Stanford University  
Medical School  
Palo Alto, California

Dear Joshua:

After all these many years I am now planning a trip to California and I write to you to find out if there be any possibilities of visiting with you and Esther to see the Department, your computer center, etc., and also to see some of the people in Biochemistry. I am thinking myself of either of the weeks Feb. 10-14 or March 16-20, and to spend about two days at Stanford. I want also on this trip to go to Caltech and see Jean Weigle and Bob Edgar, and spend probably two days there.

Would you tell me if these dates or any dates are available for a visit?

After some delay, because of the necessity of re-establishing myself in Denver, I am getting some experiments going again and I believe I will have some interesting things to talk about. In addition, my student (Barry Egan) who will go with Dave Hogness in June for a couple of years, has had quite good luck with a carbohydrate transport study in *Staphylococcus*.

Best wishes for the coming year.

Sincerely yours,

M. L. Morse, Ph.D.  
Associate Professor

MLM:lbm

Hi Larry -

we will be glad to see you. Either date(s) probably  
OK as far as I can see now. Maybe March slightly better.

John.
