AREA V
STAFF
AREA V is preparing one operational grant proposal for the forthcoming review by CCRMP. The project, coordinated by Staffman Elias Chico, proposes to create a program which will provide supportive services for the retention in nursing careers of 147 Mexican American students who have already been recruited into nursing through a demonstration grant from the Division of Nursing, Public Health Service Bureau of Health Professions, Education, and Manpower Training. The proposed project would be conducted by the East Los Angeles Health Task Force, with the cooperation of nursing faculties of ELA College, California State College of L.A., the East Los Angeles Mental Health Center, and other health organizations.

AREA V's submission for the November I cycle of Developmental Component applications--Coordination of Free Clinics--was one of a group of nine applications recommended for funding by the CCRMP Developmental Component Review Panel:

Funding of the nine projects, which requested a total of $41,639 for manpower, and $127,336 for health delivery services, has been deferred by CCRMP until late January, pending clarification of regional objectives. Coordination of Free Clinics proposes an evaluative mechanism by which individual member free clinics in So. California can assess the needs of their communities and the extent to which individual Clinics are meeting these needs, thus making it possible to improve the quality and quantity of care provided.

Preparation has begun at AREA V on a proposal for an Area Health Education Center which will be included with six or seven other applications from California Area RMP's in a statewide proposal with a possible budget of $600,000-$700,000. Staff members Dorothy E. Anderson, Kay D. Fuller, and Elias Chico are working with consultant Jane Katz on this project. The development of an AHEC Advisory Group for AREA V is being considered by Dr. Petit, Area Coordinator.
AREA V was a co-exhibitor, along with California RMP Areas IV, VI, VII, VIII and IX, at the recent Annual Meeting of the Southern California Public Health Association in Anaheim, December 3. Hanya Salkeld (AREA V secretary) staffed the booth, which displayed brochures and information about the RMP Areas which serve Southern California, and Dorothy E. Anderson coordinated the joint exhibit and publicity.

A 1972 Symposium on Critical Care Medicine and Circulatory Shock, to be presented in Los Angeles February 23, 24 and 25, 1972, has been announced by the USC School of Medicine and co-sponsors, Society of Critical Care Medicine and American Association of Critical Care Nurses (formerly American Association of Cardiovascular Nurses). For further information and applications, phone 225-1511, Ext. 463.

Kay D. Fuller is AREA V's representative to the Steering Committee for the Continuing Education and Service Development Project for Extended Care Facilities (ECF's) which is a cooperative effort of RMP Areas IV, V and VIII. She reports that the following tentative course schedule for workshops has been determined: March 7 - May 9, (Los Angeles), March 15 - May 17 (Orange County), March 23 - May 25 (Los Angeles). A second series will be given June through August (Fresno, Santa Barbara, and Los Angeles). Brochures and enrollment information will be available in the near future. Priority will be given to those ECF's who are able to send both administrator and nursing director. The new project director is Kelly Swaryck, who brings to the program some valuable experience in the nursing field in the State of Washington.

If you missed the first outstandingly successful Conference on "Infection--A Contemporary Problem" you will be pleased to hear that there is to be a repeat program on March 24-25, 1972 at the Los Angeles Hilton. AREA V was a co-sponsor last time, along with numerous other health organizations. Brochures will be forthcoming in the near future.

AREA V staff members Dorothy Anderson, Kay Fuller, Fred Hubbard and Gail White attended the recent 2-day symposium "Confrontation with Dying" sponsored by the Ethel Percy Andrus Gerontology Center at USC. Dr. Elisabeth Kulber-Ross, Medical Director of the South Cook County Mental Health and Family Services shared with the audience her experiences with the dying and emphasized her theory that the dying have much to teach us about living. She commented that health care personnel are not aware that in their relationship with the dying they often do what meets their needs, not that of the patient and family.
