France

My dear Francois

Thank you very much for your understanding letter of the  
28th March.

I note what you say about the position of EMBO. It might  
be more sensible, if there are any further Spetsai meetings,  
for them to be financed entirely by NATO. I quite agree with  
you that in most cases the attendance at meetings should be a  
personal decision and not a collective one. Thank you for  
promising to try to cool down the French biochemists.

With all good wishes  
Yours sincerely

F.H.C. Crick
