Dear Lederberg:

I need not tell you how much I enjoyed my
visit to Madison

Since that time I had some tough time at the
Oberlin meeting (where I raised some ~~str~~ stormy
decisions with the virtue of target concepts),
at the Cancer Congress (never hold an interna-
tional convention in your own town!);
finally, I was so tired that I gave up the
Radiological congress in London, and stood
quietly in my lab.

At present, almost everyone is out in the
country, and it is a bad time for any
detective work within the Institut Pasteur.

Therefore, I'll wait until late in September
before taking care of your inquiry. But
be sure I'll do my best about it.

Best regards to your wife

Sincerely

Raymond Lataret
