IN REPLYING, ADDRESS THE
PUBLIC HEALTH SERVICE

REFER TO:

Tuberculosis Research Laboratory,
411 East 69th St., New York 21, N. Y.

March 10, 1952.

Dr. Joshua Lederberg,
Department of Genetics,
The University of Wisconsin,
College of Agriculture,
Madison 6, Wisconsin.

Dear Joshua:

Under separate cover we are sending you cultures of our wild type W strain, and one diauxotroph and two triauxotrophs. The mutants have absolute requirements except for the PAB requirement which is slightly relative. The supplements we used in our tests for their growth requirement were in γ /ml:

L-tryptophan	20
L-histidine	40
DL-methionine	20
L-proline	40
DL-leucine	40
PABA	0.1

I'll be interested to hear how they behave in your tests for recombination.

With best regards,

Sincerely yours,

Werner
