Dr. Joshua Lederberg,
Department of Genetics
University of Wisconsin
Madison, Wisconsin

December 2, 1954

Dear Dr. Lederberg:

If you have any reprints for distribution of your article "All genetics and hereditary symbiosis" in Physiol. Rev. 33: 403-430, I would be pleased if you would send me one. I am studying symbiosis in cockroaches and having acquired aposymbiotic insects I am now trying to devise a method for "re-infecting" the insects with their intracellular symbiotes.

Your article is quite thought-provoking. Thank you.

Yours truly,
Marion L. Brookes
