Dear Josh,

I have finally gotten around to writing up some of the work that I have been puttering around with in the past years. The papers are divided into two parts, one on straight pure immunochemistry, which I am enclosing, and which is a necessary ~~eval~~ <sup>step</sup> to understanding the second one on a suspected precursor of beta-galactosidase. I am writing the latter now. I would appreciate it, after you have finished with the manuscript, if you would send it on to Sol Spiegelman, inasmuch as I have only a limited number of copies.

Jacques tells me that he will drop you a line any year now on what we are doing. I am looking forward to the possibility of seeing you at the International Congress. Should you run into Harold Deutsch, do send him my regards,

*mel.*  
Sincerely yours,

Melvin Cohn
