

September 14, 1955

Dear Professor Cr ez e

Do you recall our correspondence of 2-3 years ago?

I have hoped to see some published notice of your work on the transformation of V_i^+ , but am afraid I have overlooked your publication. I would be most indebted to you if you would keep me informed (for example by reprints) of the status of your most interesting studies.

Yours sincerely,

Joshua Lederberg
Professor of Genetics
