November 21 1954

Dear Joshua,

This is just a brief note to say that I will not be able to come up on Thanksgiving. The press of worldly affairs here — preparing lectures and laboratories for the class — will prevent me from budding for a month or so. I have not even been able to do an experiment since seeing you. This has proven particularly frustrating since the visits to Urbana and Madison were so invigorating.

I hope you will have a nice holiday. Please give my best regards to Esther and the Cavalli's.

I spoke to Kornberg about Morse immediately upon returning here and he has told me nothing more since then. He knows Easter and may have contacted him. I suspect he is trying hardest for some sort

of animal virologist. I will try and find
out what's what and let you know.

With best wishes -

Bob
