Dear Josh and Esther,

Have sent under separate cover two reprints of the *lozyne* crossover paper. If you need more, I can send them on since I have a few left. I'm certainly glad to hear about the Lee "alleles" crossing over. It means that *lozyne* isn't so special. Pontecorvo wrote me that he appears to have similar cases in *Aspergillus*. I'm working on another locus at present which from the preliminary results looks like another *lozyne* case.

Glad you are planning to be in Minneapolis for we hope to attend the meetings too. Our regards to Crow, Irwin et. al.

Phil and Kathleen
