October 14, 1947.

Dr. S. A. Koser,
Dept. Bacteriology,
University of Chicago,
Chicago, Illinois.

Dear Dr. Koser,

If they are still available, I should greatly appreciate reprints of your early papers on the action of coliforms on methyl glycosides.

Do you know of any reference to the responses to the beta-glucosides? I have been searching the literature for references to fermentation reactions of coliforms on the rarer disaccharides and synthetic glycosides and have found very little, particularly in the past decade. I should be very much obliged for any bibliographic references to this subject, which I hope to enter experimentally as soon as my laboratory is ready.

Yours sincerely,

Joshua Lederberg
Joshua Lederberg
Assistant Professor
(Genetics of Microorganisms)

Name and volume of
journal will be quite
sufficient.

Dear Dr. Lederberg, -

Oct. 20 1947

Sorry, but my supply of reprints of our principal publication along this line is exhausted. It was published in *J. Bact.*, Nov. 1933, Vol. 26, p. 475.

Am sending you reprints of two other publications. I do not have any additional references to this line of work. Yours very truly
Stewart Koser
