

July 2, 1946.

Miss Esther Zimmer,
1268 Grant Avenue,
New York 56. N.Y.,

My dear Miss Zimmer:

On enquiring of Dr. Garnjobst here as to what you were doing with *Neurospora* lately, I was pleased to learn that you were in New York. Since I expect to be in the city during the next few weeks for the Cold Spring Harbour Symposia, I hoped that you might find it convenient to meet me and discuss some of the work on 1633. Dr. Beadle may have mentioned to you that I had been working on the adaptations of pabless strains last Fall; your name was mentioned in several of his letters to me, which inspired this request for an interview.

I shall be staying at a Queens address c/o A. Iannone, 100-09 40 Rd., Corona, for the duration of the Symposium. I hope that you can write me there and mention how I may get in touch with you to arrange a meeting in time for us to do so.

Very sincerely yours,

Joshua Lederberg,

Call Dave at Ryan's , for ride back.
