Dr. Charles C. Brinton, Junior
Department of Biophysics
University of Pittsburgh
Pittsburgh, Pennsylvania

Dear Dr. Brinton:

Let me acknowledge that I have the material you sent me at this address. Thank you very much for the chapter from the book.

I am getting along now in the organization of our department and have already brought your credentials to Dr. Kaplan's attention. I will let you know what we can do as soon as possible but this may still be some weeks from now. I hope it will be possible for you to accommodate this delay.

Yours truly,

Dr. Joshua Lederberg
Professor of Genetics
