Dear Josh,

I have been invited to attend your next "Antibody Workshop" in Cold Spring Harbour in the beginning of June. It is a nice opportunity for me to visit my friends and colleagues in the U.S. We have decided to come, Suzan and myself and to stay in the States during the month of June.

I would like very much to visit both of you, and your Department in California. Do you think it could be possible for you to invite me to give some sort of lecture at your group and to allow me some kind of travel expenses ; this would be of great help.

In any cases we are looking forward eagerly to meeting you and to see your country which must have changed a lot since we were there.

Yours as ~~us~~ ever.

Alain Bussard
