Dear Josh -

The main difference, now that you're gone, is that almost everything in your papers will be new to me whereas formerly many included ideas you had already spoken of. The Nobel Prize lecture is a transition - part familiar, some excitingly new. I enjoyed it immensely, even the type at the beginning - ingenious vs ingenious.

We still haven't moved into Med Sciences Bldg. yet. The plumbing contracts is holding things up because of a dispute with the University.

Say Hello to Esther.
