Communicable Disease Center
Enteric Bacteriology Laboratories
P. O. Box 183
Chamblee, Georgia

Dr. Joshua Lederberg
The University of Wisconsin
College of Agriculture
Madison 6, Wisconsin

Dear Dr. Lederberg:

Enclosed is the report on the last shipment of cultures received from you. You will note that in large part the results which you obtained with these cultures were confirmed. The delay in reporting was due to the fact that we wished to establish with certainty that the new combinations were really diphasic and not mixtures of two types. This has been done and we can assure you that the cultures so indicated are truly diphasic combinations.

The reprints for which you asked, as well as some others which may interest you, were sent under separate cover.

With best wishes, I am

For the Officer-in-Charge, Bacteriology Section

Sincerely yours,

PRE:mg

Encl.

Philip R. Edwards, Ph. D.
Bacteriologist-in-Charge
Enteric Bacteriology Unit
