

June 18, 1957

Dr. O. H. Frankel  
CSIRO Div. Plant Industry  
Canberra, A.C.T.

Dear Dr. Frankel:

I will be very happy to accept your invitation . I gather the program is to have the symposium on August 19, and the Genetics Society meeting on August 20-21. Accordingly, the address would be for the 20th. No matter if these dates are slightly off; I will be at your disposal in any case.

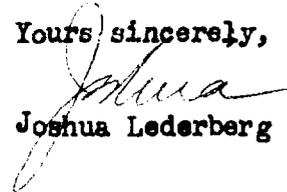

Fortunately Rubbo is passing through Chicago July 9 on his way back from Moscow & we will have a chance to make last minute arrangements with him then. According to our itinerary, we shall be arriving at Sydney Monday Aug 12, 1957, by Qantas 733. Dr. Rowntree has offered to meet us at the airport , and also to drive us from Sydney to Canberra on the 17th or 18th. So we seem to be very well taken care of.

If you have not already posted a title, I will borrow one from the plant cyto-genetico-taxonomists and speak on the

REPRODUCTIVE VERSATILITY OF BACTERIA

Till August,

Yours sincerely,

  
Joshua Lederberg
