

Kaplan

January 22, 1960

Dr. Harry E. Ungerleider
161 East 42 Street
New York 17, N.Y.

Dear Dr. Ungerleider:

Dean Alway has circulated your letter of November 1, 1959 soliciting nominations for the Oscar B. Hunter Memorial Award of the American Therapeutic Society.

We wish to propose the name of Dr. Henry S. Kaplan as worthy in every way of this recognition. While he has made a distinguished record in many aspects of medical research, the most pertinent to the present nomination is the development of the linear accelerator as a practical and useful tool in the radiotherapy of deep cancer.

In support of our nomination we enclose a list of Dr. Kaplan's publications and his curriculum vitae.

Yours cordially,

Joseph P. Kriss, M.D.
Associate Professor of
Medicine and Radiology

Joshua Lederberg, Ph.D.
Professor of Genetics
