

Basel, 24th September 1952

Dear Professor Lederberg,

I am very sorry to be so late in answering your letter. But I have been absent from the Institute with a broken leg for several months and the Hasenbühl was also very late in sending to me the answer to my letter. Unfortunately the strain is not in our collection; we do not keep them longer than 5 years.

As you can see from the letter from Hasenbühl (lunatic asylum) the patient has been in the Alsace and acquired the illness there, during the war time. The case has been a single one in the asylum.

Hoping that my notes are of any use to you

I am

Yours sincerely

*Bertrud E. Mislav*
