Dr. Toshura Lederberg
Department of Genetics
University of Wisconsin
Madison, Wisconsin

Dear Dr. Lederberg:

I had visited your laboratory in Madison
sometime ago, and until last Fall we
moved back to California. I did work
on the heterochromatin cycle in *Ascaris*
chromosomes under the guidance of
Dr. R. B. Goldschmidt and Dr. Curt Stern
in Berkeley. I am seeking for a research
position in the San Francisco Area. I would
appreciate your advice if your laboratory
will have opening for cytological study in
relation to medical research.

Lin, T. P.

Very sincerely yours,

T. P. Lin
