Dear Joshua & Esther:

While at the Cornell meeting I learned that Calvin (at 12th) was getting better since your trip (15th) to Cornell. Do you have any info on this? Again, people think this may be a characteristic of all K12 crossed. I don't have a copy of stage H6 (W3325?) and would appreciate one if you can send it. It showed some the 7-4 characteristic of possible. The other day I met A. Campbell, W3079 (at 14 - less than a 30%) I don't know whether you want to keep a record of that or not.

Sincerely, Larry Morse
