Biology Division

Dr. Joshua Lederberg  
Department of Genetics  
University of Wisconsin  
Madison 6, Wisconsin

Dear Dr. Lederberg:

I have read with considerable interest your paper on Phase variation in *Salmonella* and would like very much to have a reprint of this paper and the previous one with Edwards on this subject if they are available. I would like very much to be placed on your reprint list. If it is not asking too much I would be most grateful if you could send me copies of available reprints on bacterial genetics.

Kim Atwood had a good summer at Woodhole and spent most of his time, I think, at boat racing. He and Barbara manage to win a few races and get a cup or two for their efforts. They have now started to build an addition onto their house and are looking forward to the additional room.

Sincerely yours,

*Thad H. Pittenger*
