Dr. & Mrs. Joshua Lederberg  
716 Alvarado Row  
Stanford, California

Dear Dr. Lederberg:

I would like to take this opportunity to more formally express my thanks to you for opening Stanford University to me through your department. It was an experience that my wife and I will remember in a most pleasant way for many years.

Although I wished that our contacts and conversation could have been more numerous, I really tried to temper my feelings with the knowledge of the goals that you set for yourself and of the many others who bid for your time. The discussions that I had with you were humbling, enlightening and vital, and for this I am most appreciative. I hope that we can maintain contact and perhaps be of assistance to one another in the future. My contribution this time was only a fraction of what we received from you, Stanford University, the community at large, and the Jewish community of the Peninsula.

Steve is working for me for the month of September to improve the quality of the work. I redrafted the paper. After incorporating the new information and discussing the report with others I will send it to you again for suggestions and approval.

Perhaps after Dr. Shooter gets settled it would be useful for me to come out to help to provide a continuum for the project. I would like to see the project given a maximum chance for success.

Most sincerely,

Herbert S. Posner
