MADISON 6, Wisc.

Dear Josh,

I am actively engaged in arrangements which would make your visit possible in connection with the CIBA Symposium. ^{invitation} One of the things is that I have tried to join forces with Cavalli. Another possibility is that we may have one of the small (20 people maximum) Rockefeller Meetings here, and there are also other possibilities as well. The possibility with the Agricultural Research Council via Catcheside has failed.

Whenever the time gets short and you need to take a final decision please let me know before doing anything irreversible. I am determined to get you and Esther over next spring.

Yours sincerely,
