June 23, 1914

Dear Josh,

I'm sending another culture of 153.4 because of the mistake in numbers to make sure we sent the correct culture. I believe the label on the tube (154.4) was wrong - 154.4 is white. I noticed our last plant of 153.4 had a lot of white reversions popping up - as we've rectified and are sending a ricedated stock. These strains are for example as reserved from carbunculosis that were had not difficulty with carbuncles. Caroline R.
