AUG 2 1974

Was this ever published?

I apologize for having neglected to reply; it happened that I am working on a rather detailed account of the history of bacterial genetics in the 40's.
Briefly:

Crossing in E. coli was an empirical verification of a
Hunteed anticipatio
explicitly sought after.

Recombination was also discovered
with the course of other
studies.

Spheroplasts after penicill
and virus.

See Tatum's Nobel lecture
(1955) for remarks on sex and
