9th November 1967

Professor J. Lederberg,
Department of Genetics,
Stanford University,
Stanford, California, U.S.A.

Dear Joshua,

I am sorry to have been so long answering your query about the introduction of a national system of medical records. I am afraid to say that, at the moment, what documentation exists is confidential, as the introduction of the system will need a good deal of further discussion and also some legislation. However, what we have is so speculative that I do not think it would be very much use to you. I will write and let you know when something more definite becomes available.

Best wishes to you and Esther.

ours sincerely,

Chris
