Re: Dr. Errett C. Albritton
Information Exchange Group
National Institutes of Health

I wonder if I might ask to be placed on the mailing list for the Information Exchange Group series on computer simulations. I do not know how restricted you are with regard to accepting further subscribers, but if it is not stretching the point too far, I would also like to enter the same request on behalf of Dr. Feigenbaum, who may be addressed c/o the Stanford Department of Computer Science, and Mr. Wiederhold, who may be addressed c/o the ACME Medical Computer Facility, Stanford School of Medicine.

I would also be very pleased to have reprints as may be available of your writings on computational support for diagnosis.

HOMER
