

Memo from  
JOSHUA LEDERBERG

To: Dr. Wizenberg

AUG 5 1971

Filbert lectureship.

Thankyou so much -- and I wish I could.

But November-January are blacked out for me by commitments to the Mariner-Mars orbiter mission. If you still want to stretch a point, could you settle ~~XXXXXXXXXX~~ a lecture Monday afternoon Feb. 6, but leaving Baltimore in time for a 6pm flight back to San Franc.

I might also make dinner Sunday night, but would have other business in Washington Mon a.m.

If as would be understandable you can't fit this into your program, I must ask for a hypothetical raincheck.

Sincerely,

PROFESSOR JOSHUA LEDERBERG
