20 December 1972

Dear Josh,

A letter from L.C. Dunn, just received, and he mentions his continued interest in genetics and that he will be in Berkeley to give a course in February. I am not sure if he will give the course then because he mentions the Fall Term. Possibly he will visit in February and then come back for the Fall Term of 1973.

In any event, I thought I should pass the information on to you in case you wish to talk with him about the history of genetics.

The weather here is wonderful. Hopw you and the family are being equally blessed.

Sincerely,

A handwritten signature in black ink, appearing to be "J. Moore". Below the signature is a horizontal line, and the name "MOORE" is printed in capital letters to the right of the line.

MOORE
